ROAD & SLAB SAWING!!

We can cut anything from roads, floors, bridge decks, and other foundations. We can cut any flat surface ranging from 8"-20" thick. This saw specializes in projects like airports, highways, streets, alleys, parking lots, driveways and more. It can also cut inside buildings with its Catalytic Converter, fumes are not an issue. This saw is designed to reduce breakage & damage to adjacent concrete. With its powerful gear box and tracking system it's ideal for mid size and small jobs that require high production rates. With its gear box and tracking system, it is ideal for all job sizes small, medium, and large!
